Reimbursement and Policy

Revenue Calculator Refresher and Legacy Payment Allocations

Debbie Harrington,
Associate Healthcare Fiscal Analyst

Revenue Calculator Refresher

When using the Revenue Calculators:

- Depending on your program type select Tab A CD clinic or Tab D OTP Program. (the audio uses CD clinic as the example, OTP works the same)
- Data is entered in the Yellow cells.
- Click on cell E4, click on arrow and select Upstate or Downstate.
- Click on cell E5, enter your facility's Threshold rate/Legacy rate.
- In Column I, enter the estimated number of services to be provided for each service listed. This number includes second services.
- In Column L, enter the number of second services for each service listed. If a cell is grayed out, this service does not receive a 2nd service discount.
- Column O illustrates if the service listed is paid at Blend or Full APG.
- Tab B or Tab E illustrates the Phase In impact.
- Tab C or Tab F can be used to save different scenarios.

Legacy Portion of a Claim and the Remittance Advice

General Information about the Legacy Portion of a Claim:

- There is one legacy payment paid per claim regardless of the number of services provided on that visit date. *(If a Blend APG is reimbursed on the claim, there is a legacy portion to the claim.)*
- The legacy portion of the payment is Allocated/Distributed among the Blend APGs that are being reimbursed.
 - The Allocation/Distribution causes the amount shown on the remittance advice to differ from the APG portion shown on the Revenue Calculators.
 - CSC allocates the legacy portion of the claim to the Blend APGs.
 - The Revenue Calculators calculations are correct for the purpose in which the calculators were created. The Legacy portion is a separate part of the overall Revenue calculation.
 - Therefore, we created an Allocation file to illustrate the distribution of the Legacy portion.
- An Allocation file has been developed for CD clinics.
 - This file calculates the allocation/distribution of the legacy portion of the claim to replicate the line level reimbursements that are shown on the CSC Remittance Advice.

NOTE: In OTP Programs, for dates of service 7/2/12 and forward, an allocation file is not necessary because the legacy payment is paid through its own claim and associated remittance. An allocation file is available for OTP Programs for dates prior to 7/2/12.

Legacy Portion of a Claim/Remittance Advice

- **How to use the Allocation Files:**
 - Select the Allocation file appropriate for the clinic type that is being reimbursed.
 - CD Clinic
 - OTP Program (for dates of service prior to 7/2/12)
 - The following pieces of information need to be entered on the selected file:
 - APG base rate,
 - Legacy rate, and the
 - Weights of the services being reimbursed on the claim.
 - Proceed to next slides for Data Entry guidance.

Legacy Portion of a Claim/Remittance Advice

- **Data Entry for CD Clinic Allocation File:**
 - In Cell J3, Enter APG Base Rate
 - In Cell N3, Enter Legacy Rate
 - In Cell H6, Enter the higher weighted Blend APG service weight
 - In Cell H7, Enter the lower weighted Blend APG service weight if a second Blend APG service was provided.
 - In Cell H9, Enter the weight of the Exempt Blend APG service if an Exempt Blend APG service was provided.
 - In Cell H11, Enter the weight of the Full Reimbursement APG service if a Full Reimbursement APG service was provided.
- The file automatically calculates the allocation/distribution of the legacy portion of the claim for each Blend APG service that was entered.
 - The APG portion for each Blend APG on the claim and the allocation/distribution portion for each Blend APG on the claim are automatically added together for a line level sum and each of the individual line level sums are automatically totaled for a final claim reimbursement amount.
(There may be a rounding difference of a penny or two when compared to the CSC Remittance Advice.)

**Allocation of Legacy Payment to APG Services Being Reimbursed
CD Clinics**

HCPCS/CPT Code	HCPCS/CPT Code	HCPCS/CPT Procedure	Procedure Weight	APG Base Rate	APG Phase-in Portion	Legacy Rate	Legacy Phase-In Portion	Ratio to Distribute Legacy Portion to APG Services	Allocation of Legacy Portion	Total Reimbursement as Shown by CSC
				\$147.59	25%	\$64.49	75%			
							\$48.37			
Blend APG 1st Service	G0397	Individual-Brief	0.6206	\$91.59	\$22.90			0.683	\$33.01	\$55.91
Blend APG 2nd Service	H0005	Group	0.3207 *	\$42.60	\$10.65			0.317	\$15.35	\$26.00
Exempt Blend APG				\$0.00	\$0.00			0.000	\$0.00	\$0.00
Full Reimbursement APG				\$0.00	---			---	---	\$0.00
		Total			\$33.55			1.000	\$48.37	\$81.92

*Lower weighted Blend APG service discounts 10%

04-2012 By: D. Harrington 518-485-2178

=Exempt from 2nd service discount Blend APG

#Full Reimbursement APG

Enter APG Base Rate and Legacy Rate in Appropriate Boxes

Enter HCPCS/CPT weight appropriate for service provided

Legacy Portion of a Claim/Remittance Advice

- **Data Entry for OTP Program Allocation File (for services prior to 7/2/12):**
 - In Cell J3, Enter APG Base Rate
 - In Cell N3, Enter Legacy Rate
 - For Cell H6, Enter the weight for the first day Med Admin
 - For Cells H7-H12, Enter the weight for the 2nd thru 7th day of Med Admin corresponding with the number of days the client came into for Med Admin.
 - In Cell H14, Enter the higher weighted Blend APG service weight
 - In Cell H15, Enter the lower weighted Blend APG service weight if a second Blend APG service was provided.
 - In Cell H17, Enter the weight of the Full Reimbursement APG service if a Full Reimbursement APG service was provided.

For the OTP Allocation File, it may be necessary to modify the current number of lines for the specific APG types to account for additional services which were provided and are being billed on the weekly claim.

- The file automatically calculates the allocation/distribution of the legacy portion of the claim for each Blend APG service that was entered.
 - The APG portion for each Blend APG on the claim and the allocation/distribution portion for each Blend APG on the claim are automatically added together for a line level sum and each of the individual line level sums are automatically totaled for a final claim reimbursement amount.
(There may be a rounding difference of a penny or two when compared to the CSC Remittance Advice.)
