

Office of Alcoholism and Substance Abuse Services

As you know, each NYS OASAS licensed program is required to designate a Health Care Coordinator. HealthCare Coordinators are an integral part of our communication efforts as we believe you are connected to many facets within your organization. Since it has been some time since we met with Health Care Coordinators, the designee for your program may have changed or may have left. Since we will be resuming regular meetings using WebEx and will need to update our list of health care coordinators, now would be a good time to decide who in your program will be your health care coordinator. Please notify us of the name and contact information of your Healthcare Coordinator. **This information should be sent to Pamela.Thompkins@oasas.ny.gov**

We value your time and plan to include up-to-date information on topics such as synthetics, LOCATDR, alcohol and the connection to heart attacks, opioids and the heroin epidemic, hepatitis, wellness self-management plus and SBIRT; will be scheduled starting in December, 2015.

The meetings will specifically be for Health Care Coordinators. Therefore, if this is not your role, please share this information with the appropriate individual, who is already your health care coordinator or who is your new designee. By letting us know the name of your healthcare coordinator, we will be sure to update our records. **Please send this information to Pamela.Thompkins@oasas.ny.gov**

Join us for HealthCare Coordinator Training
